How Do You Walk On Fire?: And Other Puzzles: 101 Weird, Wonderful And Wacky Puzzles With Science

Synopsis

One hundred more fascinating science puzzles that explain scientific principles in fun, accessible, and easy-to-understand terms. A follow-up to the delightful *How Do You Get an Egg into a Bottle?*, this amusing puzzle book yet again allows people to have fun while they learn by undertaking a wide variety of brain bending questions rooted firmly in scientific fact. By taking a new and unique look at puzzle questions, it teaches a wide variety of mesmerizing lessons—such as how to boil water in your palm, how to travel faster than the speed of light, why you can crack your knuckles, and how to walk on fire.

Customer Reviews

I ordered both *How Do You Walk on Fire?* and *How To Get An Egg Into a Bottle* ... the second one is a better book. I'm not crazy about the layout of either. It asks the question and then you have to go to the back of the book to find the answer. It would have been better to have the question on the first page and then turn to the next page for the answer. The format is hard on little kids which is who this is written for. Not great planning by the publisher. I would say, don't waste your time on this one and go for the *Egg in a Bottle* book instead.

Very interesting book filled with some great questions and answers and a lot of useless (but extremely fun) questions and answers. I would prefer to have the answers on the same page (it's not a school text book that it matters if you sneak a peek). This would save constantly flipping pages

back and forth.

It is a good fun fact book. It was for my 12 year old and she likes reading interesting facts. The only thing we think is annoying is that you read the question and then you have to refer to the back of the book for the answer. Instead of just have the answer on the same page.

i have a smart nine year old and he likes this book. the text is pretty small making it hard to read. some of the concepts are advanced. i would say for your average kid - at least 10 years old.

This book is a high quality educational aide that the grandkids love. It is well written and very much appreciated.
