Atlas Of Antarctica: Topographic Maps From Geostatistical Analysis Of Satellite Radar Altimeter Data

Synopsis

The atlas consists of 136 topographic maps derived from satellite radar altimetry (Geosat and ERS-1 data). Each map is presented together with a description of glaciologic and topographic features. The main section is preceded by an introduction and three up-to-date topics and followed by applications. Applications are in monitoring changes in Antarctic glaciers, ice streams and ice shelves, and in detailed regional studies of outlet glaciers of the inland ice. The reader will also find index maps, an exhaustive list of references on related subjects in glaciology, geodesy, geomathematics, remote sensing, and an index of the Antarctic place names.

Book Information

Paperback: 365 pages

Publisher: Springer; Softcover reprint of the original 1st ed. 2004 edition (April 19, 2013)

Language: English

ISBN-10: 3642624189

ISBN-13: 978-3642624186

Product Dimensions: 1 x 8 x 11 inches

Shipping Weight: 1.8 pounds (View shipping rates and policies)
