# Stories In The Stars: An Atlas Of Constellations

## Synopsis

A beautifully illustrated Penguin Hardcover that invites readers to travel the night sky and discover the universe of stories in the stars. To those who can decipher it, the night sky is alive with gods and goddesses, animals and mythical creatures "an endless carnival played out in shining constellations. Amidst this jet-black canvas pricked with white dots, a hunter leaps in pursuit with his dogs at his heels, a sea monster threatens a maiden in distress, and a pair of twins lives forever. In *Stories in the Stars*, writer and stargazer Susanna Hislop and international artist Hannah Waldron present an imaginative journey through the heavens. Leaping between centuries, cultures, and traditions, they explore each of the night sky's eighty-eight constellations through gorgeous illustrations and vivid descriptions that will linger in readers' minds long after they've closed the book and stepped outside on a starry night.

## Customer Reviews

I found this in a local bookstore and it was exactly what I was looking for...a kind of anthology of mythological stories of the constellations in the sky. Although there are illustrated constellations, it's not the kind of star atlas that shows you how to find Messier objects, planets, or other astronomical features with your telescope or binoculars--be aware of what you're getting. For me, this was a great book to use to get familiar with the stories behind the stars and then head out to the backyard with my son for a "campfire-like" storytelling session. The stories (and some poetry) are laid out on a page or two, while the image depicting the constellation (artist illustration) is on the facing page. I absolutely love it!

Lovely to look at and hold. I bought myself a copy after seeing the one my brother gave my father at Christmas. (He was delighted as well. Proof that this title works well as a gift for the hard-to-shop-for.)

Probably-no definitely one of the coolest books I own! It's visually pleasing and has tons of interesting facts and info on the stars in our sky!

I purchased this as a gift for my DIL and she loved it!

I want to request a refund
