# The Penguin Historical Atlas Of The Dinosaurs (Hist Atlas)

## Synopsis

For 140 million years the dinosaurs were the dominant life-form on Earth. Between the Triassic and Cretaceous periods hundreds of species of dinosaurs evolved, from the ferocious carnivore, "Tyrannosaurus" to the placid herbivore "Diplodocus." Possessing a unique reptilian bone-structure, the dinosaurs were a remarkably diverse species whose descendants remain with us in the form of birds. "The Historical Atlas of the Dinosaurs" plots the development of these monstrous rulers of the planet from their emergence from the ocean, through their dispersal across the shifting continents and their gradual evolution, to their sudden and mysterious extinction 64 million years ago.

## Book Information

Series: Hist Atlas

Paperback: 144 pages

Publisher: Puffin (January 1, 1997)

Language: English

ISBN-10: 0140513361

ISBN-13: 978-0140513363

Product Dimensions: 7 x 0.4 x 9.7 inches

## Customer Reviews

This book is full of maps and charts on when, where, and how the dinosaurs lived. It is an excellent resource for seriously interested people. The only thing I didn't like about it were the sometimes misleading illustrations. If I remember correctly, Tyrannosaurus is pictured with three manual digits.

Benton does a good job giving an overview of when and where dinosaurs roamed the earth. The art needed a little more attention to detail and the maps could have been more precise for my taste. But, all in all, I enjoyed the book and would recommend it to all.

Great book
