Intermediate Algebra: An Applied Approach

Synopsis

As in previous editions, the focus in INTERMEDIATE ALGEBRA remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. Student engagement is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately solve similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding to strengthen the foundation of student success. The Ninth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>.

Book Information

Paperback: 864 pages

Publisher: Cengage Learning; 9 edition (January 7, 2013)

Language: English

Customer Reviews

This is the book my husband needed for his class. Good book. I wish there were a few more examples of harder problems, but alas that is how most math books are. I would also like the

even-numbered answers too....most of the problems he struggled with were even.

I bought this book that said it was in good shape. However it came and it was written in and not well taken care of. I was shocked since all the other books I bought from have been in excellent to new shape. This book should have been rated in a lesser state. Its still useable but I would have liked it to not have so much writing and some of the answers are filled in and most are incorrect. Its just a messy book.

The book I ordered was lasted as being in nice condition, however when I got it the cover and spine appeared to have received significant damage and the pages seem well used. But nonetheless less, it serves the purpose I bought it for.

This book is great! Once you've completed elementary algebra, this should be your next step. A lot of people I know who've been out of school for a long time, if they don't take the basic courses first, fail college level math and have to come back to our teacher's class anyway.

This book made me realize something that I probably didn't before. That is that an applied approach is just simply skimming. That's what this book does, it skims over the concepts of Algebra. This is definitely not a solid foundation and will not benefit you if you need to take Trig., College Algebra or higher math. For instance, graphing is something you do a lot in algebra. This book does not introduce the TI-84 calculator which is essential in today's algebra. I took an intermed. algebra course at one school under this book. Well a few years later I had to retake intermed. algebra because I placed low on the math test and was put back into it at another school. I was surprisingly shocked that I had learned very little with the applied approach. It was as if I was totally new to algebra. If your instructor requests this book for your algebra class, you will not finish that course with a strong enough foundation in intermediate algebra trust me.

This is just the cheat book for the hard cover version. The downside is that it only has the step-by-step answers for the ODD QUESTIONS ONLY. IT DOES NOT CONTAIN THE ANSWERS FOR THE EVEN QUESTIONS.

I was pleased with the order and condition of the book. The order arrived on-time as promised. I will definitely order from there again. Thank you.

The seller was very supportive especially when UPS could not deliver since I was not home, they reshipped USPS at no extra fee. Highly recommended
