The Greatest Comets In History: Broom Stars And Celestial Scimitars (Astronomers' Universe)

Synopsis

Naked-eye comets are far from uncommon. As a rough average, one appears every 18 months or thereabouts, and it is not very unusual to see more than two in a single year. The record so far seems to have been 2004, with a total of five comets visible without optical aid. But 2006, 1970, and 1911 were not far behind with a total of four apiece. Yet, the majority of these pass unnoticed by the general public. Most simply look like fuzzy stars with tails that are either faint or below the naked-eye threshold. The "classical" comet "a bright star-like object with a long flowing tail" is a sight that graces our skies about once per decade, on average. These "great comets" are surely among the most beautiful objects that we can see in the heavens, and it is no wonder that they created such fear in earlier times. Just what makes a comet "great" is not easy to define. It is neither just about brightness nor only a matter of size. Some comets can sport prodigiously long tails and yet not be regarded as great. Others can become very bright, but hardly anyone other than a handful of enthusiastic astronomers will ever see them. Much depends on their separation from the Sun, the intensity of the tail, and so forth.

Book Information

Series: Astronomers' Universe (Book 725)

Paperback: 260 pages

Publisher: Springer; 1 edition (November 13, 2008)

Language: English

ISBN-10: 0387095128

ISBN-13: 978-0387095127

Product Dimensions: 6.1 x 0.7 x 9.2 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars See all reviews (1 customer review)

Best Sellers Rank: #1,509,006 in Books (See Top 100 in Books) #107 in Books > Science & Math > Astronomy & Space Science > Comets, Meteors & Asteroids #1243 in Books > Science & Math > Mathematics > History #1454 in Books > Textbooks > Science & Mathematics > Astronomy & Astrophysics

Customer Reviews

Very informative and fascinating subject material. Highly recommend!
